PROFILE

Motivated and detail-oriented Full-Stack Web Developer with strong skills in front-end and back-end technologies. Experienced in building responsive, user-friendly web applications using HTML, CSS, JavaScript, MySQL, and MongoDB. Developed real-world projects including e-commerce and agriculture platforms. Adept at solving problems, writing clean code, and eager to contribute to dynamic development teams.

PROJECT

Full-Stack Web Developer
(Project-based) self-Initoated /academic project

- Built and deployed multiple fully functional web applications with a strong emphasis on responsive design, UI/UX, and frontend-backend integration.
- Developed an E-commerce Shopping Website featuring product listings, search/filter functionality, a dynamic shopping cart using localStorage, and seamless user interaction through JavaScript DOM manipulation.
- Created a comprehensive Agriculture Services Portal providing farmers with access to crop details, weather updates, government schemes, and feedback system, using HTML, CSS, JavaScript, and MySQL for backend data storage.
- Implemented secure login systems with form validation and user session handling.
- Applied best practices in frontend development, including DOM manipulation, clean UI design, and optimized performance for a smooth user experience.
- Used MySQL for structured data handling and MongoDB for flexible data storage in feedback and dynamic content modules.
- Ensured seamless user experience across all devices using media queries, responsive layout design, and clean semantic HTML.
- Applied best practices in DOM manipulation, frontend optimization, and cross-browser compatibility for production-ready UI.
